ABOUT

A passionate front-end developer who excels at solving problems and translating UI designs into interactive, visually appealing, and responsive user interfaces (UI), ensuring an exceptional user experience.

SKILLS AND ABILITIES

Technical

My front-end skillset includes HTML, CSS, Tailwind CSS, JavaScript, React, and Git.

Soft

Problem-solving, critical thinking, communication, teamwork, adaptability, attention to detail.

EXPERIENCE

Content Writing Manager and Writer at Uvocorp 2016-2022

Worked as a writer and later managed a group of technical content writers to ensure high-quality content. Under my leadership, my team attained office status, the company's highest rank, highlighting my leadership and teamwork proficiency.

Freelance Front-End Developer 2022-Present

- **Kobe Balanced Scorecard System**

  The project aimed to create an objective and employee performance tracking system.

  - Upgraded the front-end to become responsive. This improved user experience as the site could be accessed from various devices seamlessly.
  - Upgraded from Webpack to Vite for faster development. Developers experienced faster page reload times, which improved development time.
  - The technologies used included Tailwind CSS and React

- **EO Marketplace**

  An E-commerce site that enables users to host products for sale and customers to buy and receive goods.

  - Ensured the front-end conformed to designs.
  - Upgraded from Webpack to Vite for faster development. This improved user experience as the site could be accessed from various devices seamlessly.

- **Contributed to the design.
